

School Safety Programme

Towards a Culture of Disaster Prevention in Korea

Korean School Safety Programme with UNDRR Incheon Office

Background

- Developed by UNDRR Incheon office, Ministry of the Interior and Safety, and Incheon City in 2016 to complement South Korea's disaster safety training for youth.
- The main point of School Safety Programme is based on Sendai Framework for Children.

Features

- Prevention-focused training: Focuses on providing students with information regarding what to be known and done prior to disasters
- Discussion-and participation-focused training: Utilizes diverse training materials such as RISKLAND and HAZARD Bingo games to promote better engagement

Objectives

Students can clearly understand the meaning of a disaster.

Students can become more aware of hazards around them.

Students can learn what they can do to prevent disasters.

Students can develop their capacities to save their own lives.

Children and youth are agents of change and should be given the space and modalities to contribute to disaster risk reduction.

- The Sendai Framework for Disaster Risk Reduction
