POST-DISASTER NEEDS ASSESSMENT

The Post Disaster Needs Assessment: An Overview

PDNA

POST-DISASTER NEEDS ASSESSMENT

GFDRR
Global Facility for Disaster Reduction and Recovery

Session Outline

- 1 Introduction to the PDNA
- 2 Conceptual Framework and Protocols for undertaking a PDNA
- 3 PDNA Process and Methodology

Evolution of the PDNA Methodology

**Assessment
methodology
developed
by ECLAC
in 1970s**

**Adapted for
Global use by
WB as (DaLa)**

**Strengthened by
UNDG through
social analysis
and impacts
on human
development
and recovery
initiatives**

**PDNA -common
integrated
approach
that combines
context,
effects,
impacts and
recovery
strategy 2008-**

Post-crisis Cooperation Agreement and Guidelines

On 25 September 2008, the UNDG, EU and WB signed a **Joint Declaration** on Post-Crisis Assessments and Recovery Planning

- PDNA Volumes A and B
- Disaster Recovery Framework

Presented in September 2014 at the Second World Reconstruction Conference; officially launched at the Sendai World Conference on Disaster Reduction on March 2015

Risk

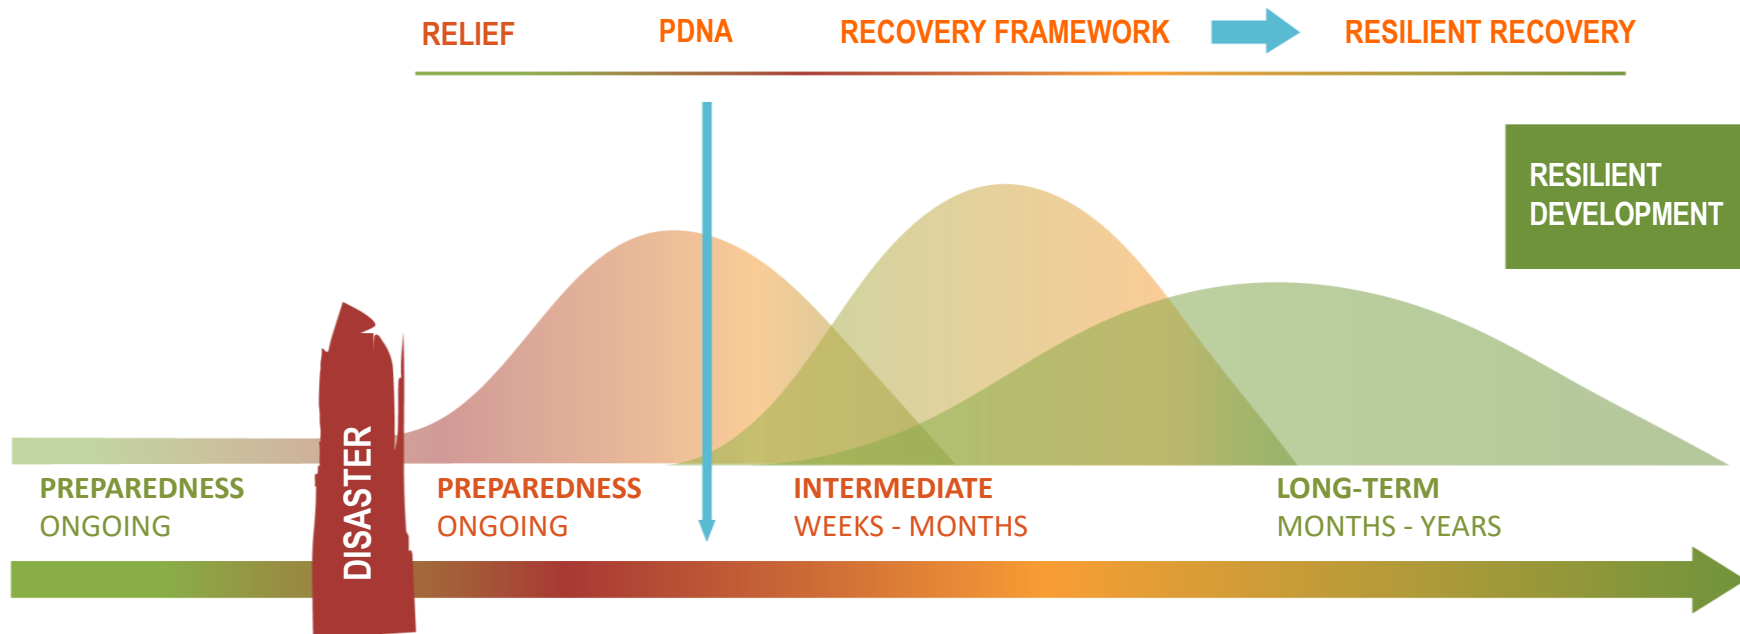

What is a PDNA: Objectives

- The PDNA is a mechanism for **joint assessment and recovery planning** after a disaster
- The joint assessment analyses the **damage, economic loss, effects and impact** of the disaster and identifies **recovery needs** across identified sectors
- The assessment also highlights the **macro-economic and human** impacts of the disaster
- The recovery needs identified helps to **mobilize resources** and develop a comprehensive **recovery strategy**

Why conduct a PDNA: Rationale

- The PDNA is envisaged as a **country owned and led process**, supported by international agencies and other stakeholders
- By bringing together key stakeholders engaged in recovery, the PDNA aims to **avoid duplication and harmonize assessment efforts**
- The multi-stakeholder approach leads to the development of a single PDNA report that can be used as a **tool for planning and programming recovery**, as well for **resource mobilization**

When is the PDNA conducted?

Resilient Recovery is a Development Imperative

PDNA Activation

Disaster

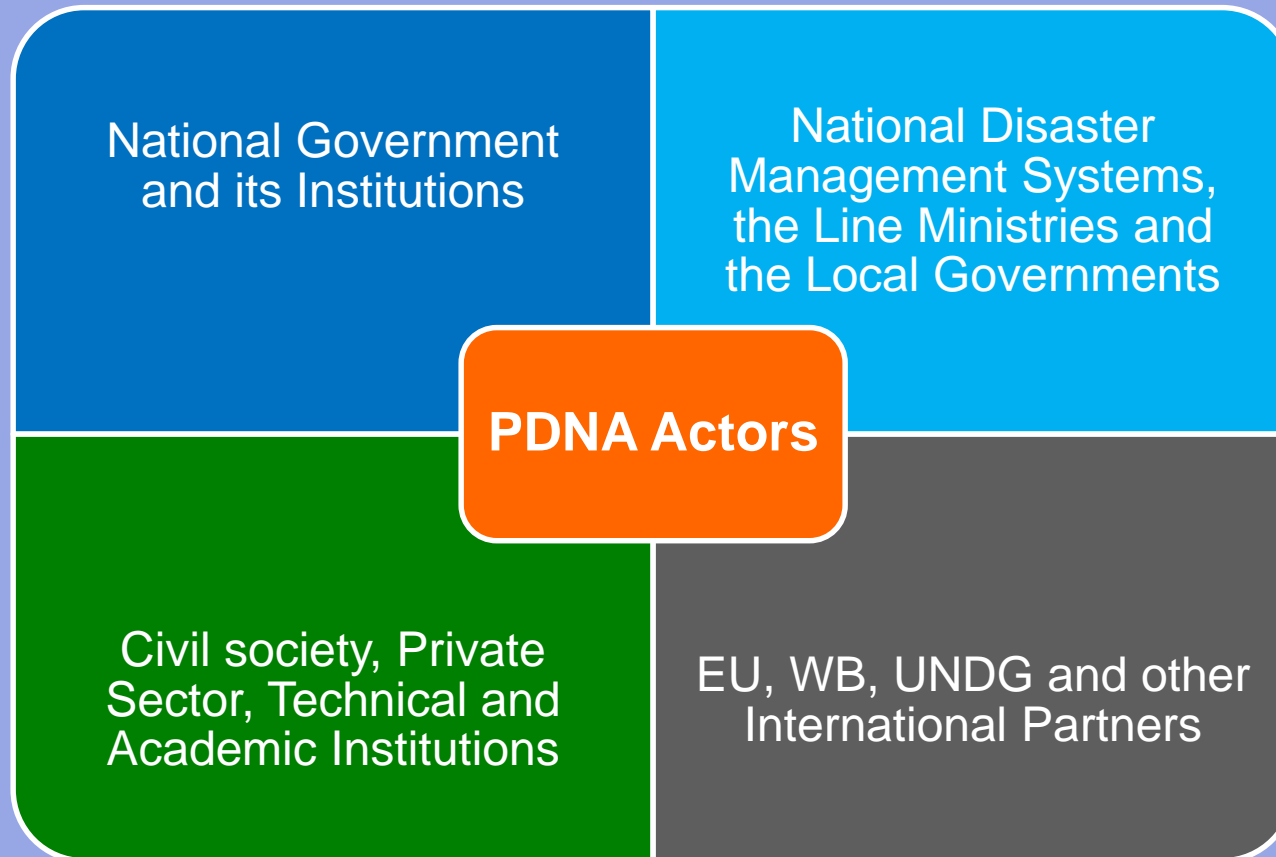

In country communication between EU, WB, UN of a possible request for a PDNA, reported immediately to HQ.

Official request from the Government and joint decision to activate a PDNA including the designation of the national lead ministry.

Deployment of a Planning Mission and formulation of the TORs for the PDNA.

Definition of the support that Government and partners will provide to the process.

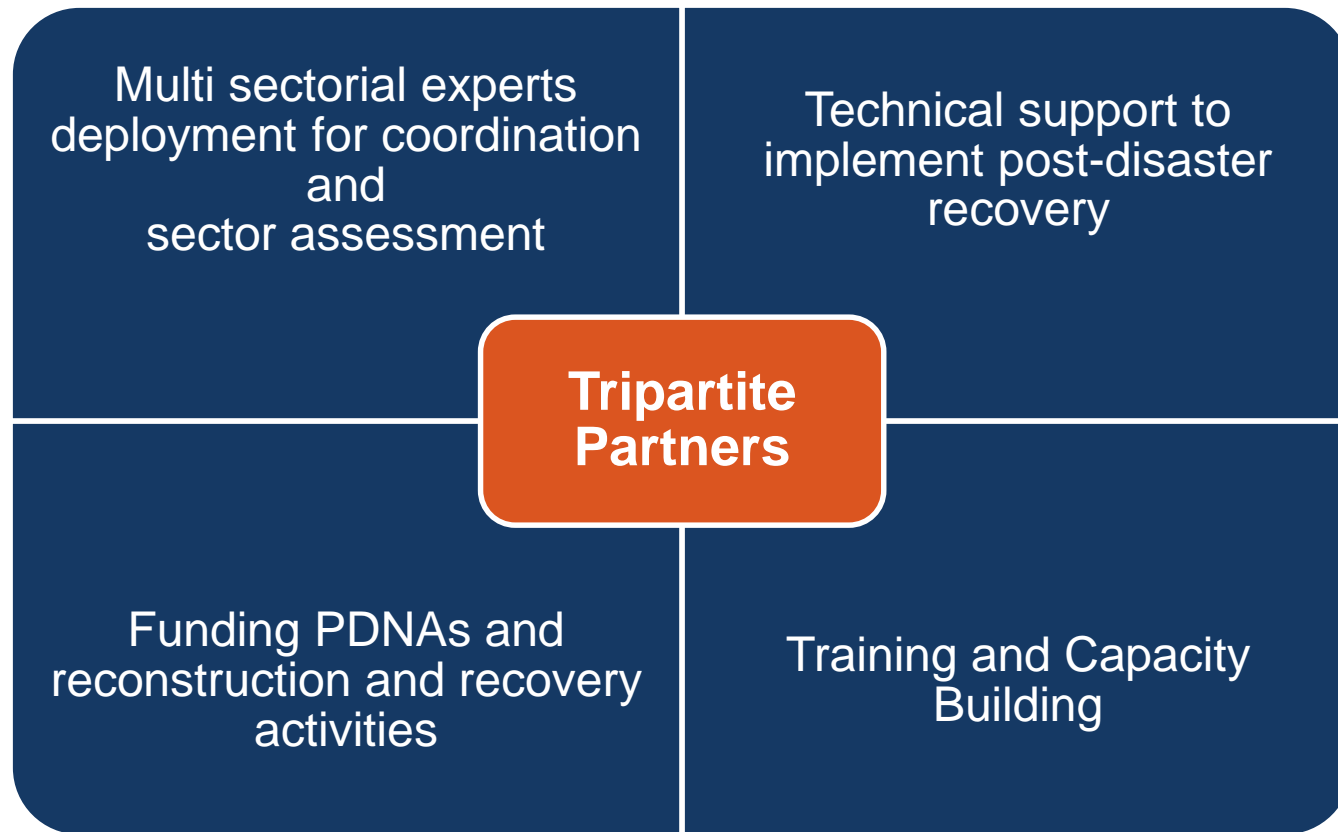

Who conducts a PDNA: Key actors

Role of the National Government in the Assessments

Leadership and Coordination	<ul style="list-style-type: none">• Designation of a Ministry to lead and anchor the PDNA process.• Brings together all national ministries and departments and international actors under a joint process
Data Collection & access to information	<ul style="list-style-type: none">• Pre Disaster data National data bases, line ministries data bases• Post disaster data : Facilitates data collection from the affected areas
Provides logistics support	<ul style="list-style-type: none">• Space for PDNA secretariat• Facilities for workshops and consultations
Reviews and endorses the PDNA report	<ul style="list-style-type: none">• Reviews all sector reports for accuracy• Approves the report at the highest office• Allocates resources, presents report for international assistance

PDNA implementation process

The PDNA Methodology

This method of analysis is undertaken for each sectors of interest.

PDNA Deliverables

Consolidated Assessment Report

based on sector reports that present disaster effect and impact, recovery needs, and impact on cross-cutting concerns.

Recovery Strategy

including the vision for national recovery, prioritized sector-specific recovery interventions, costs, timelines and potential actors.

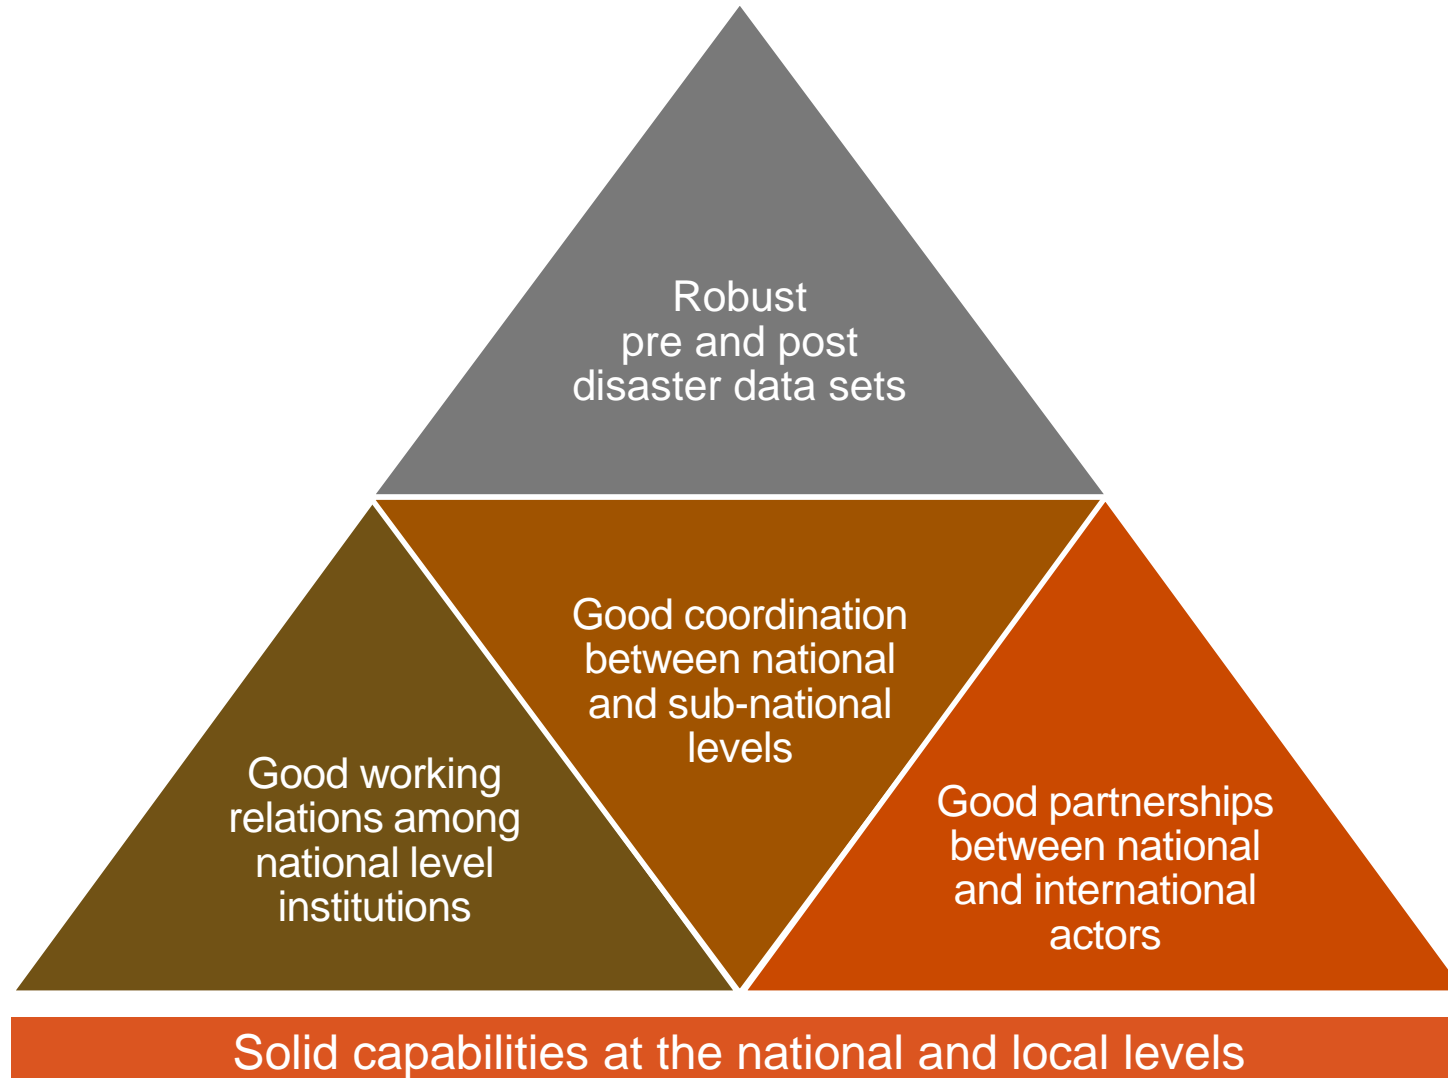

Basis for Mobilizing (Financial) Resources through allocation of local, national and international sources.

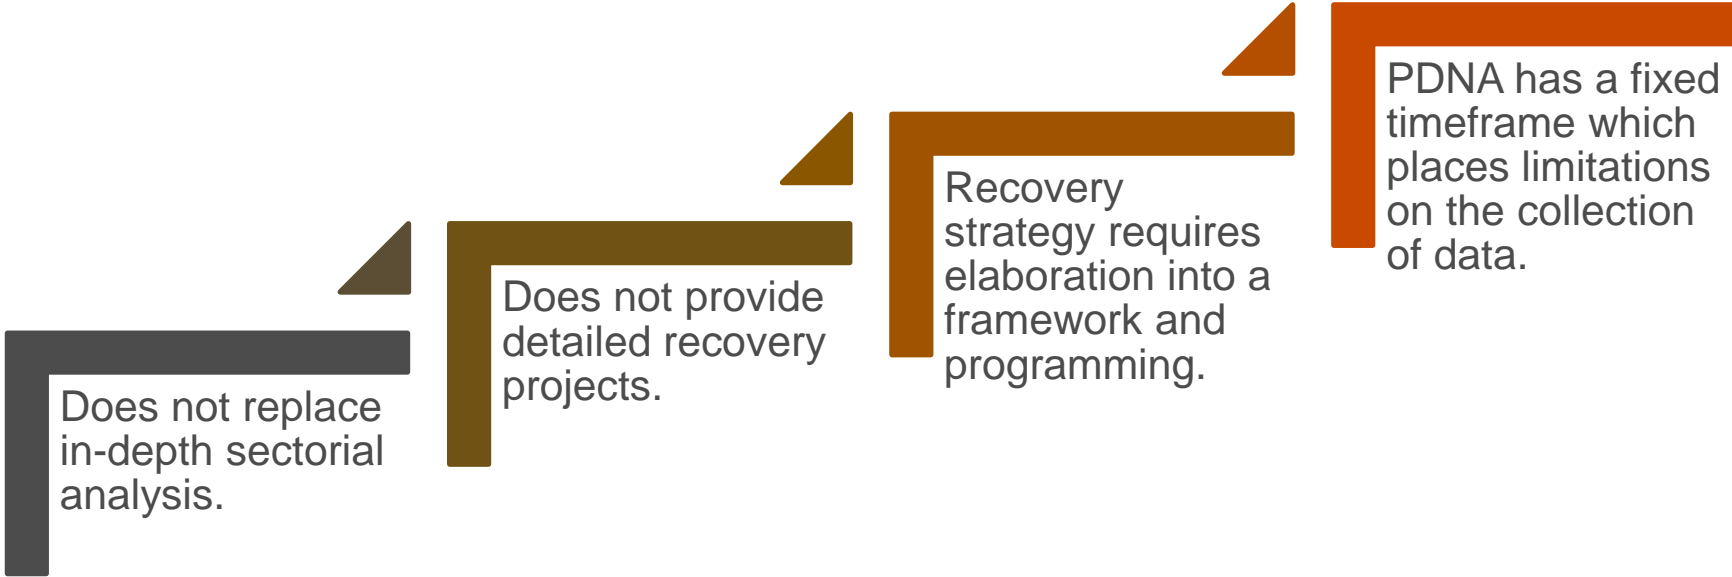

Outline for Implementation Mechanism led by the affected country for implementing the recovery strategy.

Enabling conditions for a successful PDNA

Limitations to Methodology

Does not replace in-depth sectorial analysis.

Does not provide detailed recovery projects.

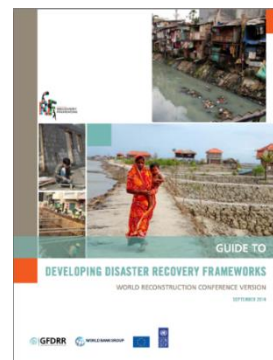

Recovery strategy requires elaboration into a framework and programming.

PDNA has a fixed timeframe which places limitations on the collection of data.

Tools and guidelines for PDNA

- Agreed protocols and methodology for the assessment: PDNA Vol. A
- 18 Sector-specific guidelines: PDNA Vol. B
- A Disaster Recovery Framework: DRF
- Training package.
- Roster of experts for PDNA.

PDNA a well established mechanism

Impact of the 2008 Declaration on Post-Crisis Assessments and Recovery Planning:

Today, the PDNA is a globally applied tool. Since 2008 over **50 assessments** have been conducted in more than **46 countries (as of April 2018)**

HOW WE DID IT KERALA AND
ODISHA

KEY STEPS
